As a Front-End Developer and Graphic Designer, I navigate the intersection of design and technology, blending my creative flair with technical know-how. My expertise lies in creating visually captivating designs while ensuring seamless user experiences on digital platforms. I thrive on translating concepts into captivating visuals and intuitive interfaces, merging aesthetics with functionality to engage audiences effectively. Whether it's coding dynamic websites or crafting compelling graphics, I'm passionate about bringing ideas to life in the digital realm.

Experience

- Jr. front-End Developer | Intern | Decorum Technology Pvt. Ltd.

2022- 2023

 - Contributed to a React.js-powered dashboard app, aiding data visualization.
 - Collaborated on responsive UI components for cross-device usability.
 - Improved code efficiency, resulting in a 20% faster load time.
 - Ensured accessibility compliance for diverse user accessibility.
 - Engaged in agile practices like daily stand-ups and code reviews.
- Jr. Graphic Designer and Content Writer | Decorum Technology Pvt. Ltd.

2021 - 2022

 - Contributed to branding projects, creating visual assets and graphics.
 - Collaborated on various design elements ensuring consistency across platforms.
 - Improved workflow efficiency by implementing streamlined design processes.
 - Ensured design deliverables met client requirements and deadlines.
 - Actively participated in team brainstorming and design critiques.
- Jr. Underwriting Assistant | Neco Insurance

2015 - 2016

 - Supported underwriters in risk assessment and policy analysis tasks.
 - Assisted in data collection and analysis for insurance applications.
 - Contributed to documentation and paperwork for policy processing.
 - Conducted initial screenings to ensure application completeness.
 - Collaborated with the team to maintain accurate records and databases.
- Coordinator & Labor Representative | ABC Overseas Pvt. Ltd.

2016 - 2017

 - Mediated between management and labor, resolving conflicts and ensuring compliance.
 - Negotiated agreements, led meetings, and supported policy development.
 - Liaised between departments to address issues and ensure fairness.

Education

- Nepal College Of Information Technology | Balkumari, Lalitpur

2018 - Present

Bachelor of Computer Engineering
- National School Of Sciences | Lainchaur, Kathmandu

2012 - 2014

+2 Science

Skills

- Proficient in React.js, JavaScript
- HTML, CSS
- Responsive Design, UI/UX Principles
- RESTful APIs
- State management (Redux, Context API)
- Version Control (Git)
- Testing frameworks (Jest, React Testing Library)
- Agile/Scrum methodologies
- Familiarity with backend technologies (Node.js, Express) is a plus
- All Adobe Creative Suite (Illustrator, InDesign, Photoshop, After Effects and Premiere Pro)

Projects

Hotel Review and Recommendation System, Web App

Description: Developed a responsive online bookstore allowing users to browse, search, and purchase books. Implemented a user-friendly interface with advanced search filters and a secure checkout process.

Role and Contributions:

- Led the front-end development using React.js, designing and implementing the UI components and state management.
- Collaborated with the backend team to integrate RESTful APIs for book data retrieval and user authentication.
- Implemented responsive design principles for optimal user experience across devices.

Technologies used:

React.js, JavaScript, Redux for state management, HTML, CSS, Bootstrap for styling, RESTful APIs for data integration.

Movie Sentiment Analyzer | Web App

Description: Developed a web application that utilizes AI and natural language processing (NLP) to analyze and display sentiment analysis of movie reviews. Users can input a movie title or review text, and the app provides sentiment scores (positive, negative, neutral) along with key insights.

Role and Contributions:

- Led the development using React.js for the front-end interface, creating a user-friendly input system and result visualization.
- Integrated an AI-based sentiment analysis model (such as NLTK) using Python and Flask for backend processing.
- Collaborated with data scientists to preprocess and analyze movie review datasets for accurate sentiment analysis.
- Implemented responsive design principles, ensuring the app functions seamlessly across devices.

Technologies used:

React.js, Python, Flask, Natural Language Processing (NLP) libraries (NLTK), RESTful APIs, HTML, CSS.
